Search Notes

Dear Christina,

Please find below an inventor search in the bibliographic and full-text foreign patent files, as well as keyword searches in the patent and non-patent literature files, both bibliographic and full text.

References of potential pertinence have been tagged, but please review the whole packet in case you like something I didn't.

I also looked briefly at some internet sites but could not locate the aspect as described here.

Included too are some partial print-outs from the JPO/EPO/Derwent databases using keywords; these may prove useful to you.

Please contact me if I can refocus or expand any aspect of this case.

Happy Holidays!

Sincerely,

Emory Damron

SEARCH REQUEST FORM

Scientific and Technical Information Center

Requester's Full Name: Christina M. Marks Examiner #: 79589 Date: 11/19/2003
Art Unit: 3713 Phone Number 305-7497 Serial Number: 09/94/347
Mail Box and Bldg/Room Location: CP2 10D2 Results Format Preferred (circle): PAPER DISK E-MAIL

Examiner Office: CP2 10B12 Max

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: LOTTERY INSURANCE METHOD

Inventors (please provide full names): MANU GHELA

Earliest Priority Filing Date: 28 AUGUST 2001

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

- Lottery with both tax-insured tickets and non tax-insured tickets available wherein the tax-insured tickets are more expensive but if a jackpot is won the tax-insured ticket will pay a portion of the taxes on the jackpot as well as the jackpot.
- Lottery with both payout-insured tickets and non payout insured tickets wherein if the winner has a payout insured ticket they will be paid full amount of jackpot immediately regardless of its worth.
i.e. when taking the lump sum for a powerball win payout insured tickets will get the same amount as the actual jackpot, not a docked amount. usually associated w/ lump sum payout.

STAFF USE ONLY

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3730

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

Drop off or send completed forms to STIC/EIC3700 CP2 2C08

Method for supplying advertisement lottery ticket using internet

Abstract (Basic):

... A method for supplying an advertisement **lottery** ticket using the Internet is provided to enable a consumer to receive an opportunity for receiving a **prize** winning money and enable a **lottery** ticket entrepreneur to pay a **prize** winning money through a contract with an **insurance** company by connecting to a web server managed by the **lottery** ticket entrepreneur and requesting a **lottery** ticket issue for publicizing a store of an advertiser, thereby enabling the **lottery** ticket entrepreneur to receive an advertisement **lottery** ticket adapted to an image of an individual or the store at low cost and...
... A general user or an advertiser(20) connects to a web server(50) of a **lottery** ticket entrepreneur(10) through an Internet. The advertiser(20) orders a **lottery** ticket to the **lottery** ticket entrepreneur(10) in accordance with a procedure for purchasing an advertisement **lottery** ticket and executes an electronic payment of a cost with respect to the ordered advertisement **lottery** ticket. The advertiser(20) distributes a supplied advertisement **lottery** ticket to a consumer(30) without pay. Thus, the consumer(30) connects to the web server(50) at a drawing date for checking a drawing of the advertisement **lottery** ticket through a member joining process. If the advertisement **lottery** ticket is drawn, the consumer(30) receives **prize** winning money from an **insurance** company(40). If the consumer(30) is not a member, the **prize** winning money is paid from the **lottery** ticket entrepreneur(10)...

Lottery conduction method involves paying two different prize amounts
of jackpot to non- insured and insured winning lottery ticket
holders respectively at different payout times

Abstract (Basic):

... A jackpot for the lottery is determined. The two prize
amounts that are respectively less than and greater than the jackpot ,
are paid to holders of non- insured and insured winning lottery
tickets at corresponding payout times.

... For conducting lottery .

...

...The involvement of the two different jackpot amounts enables the
lottery participants to collect their share of jackpot immediately
after winning...

...The figure shows the flowchart of the lottery conduction method

ABSTRACT EP 497562 A2

A slot machine wherein a predetermined insurance premium value is set for example by inserting a predetermined number of coins besides a value, e.g. a number of coins, to be bet on each game prior to starting a game, thereby to start an insurance period. During the insurance period, the values having been bet on games are summed up. When the sum reaches a predetermined amount, a predetermined value of insurance is paid out, whereupon the insurance period is terminated. Also when a big hit occurs, the insurance period is terminated. A display displays the values having been bet on games played in insurance period. The number of games may be used instead of the values having been bet on the games. (see image in original document)

English Abstract

The **gaming** system operates a **lottery** system for a single state, or includes multiple state systems (502, 504, 510) each having many different instant-winner ticket games (32) and distributed ticket dispensers (530). A supervisory computer system is provided. A jackpot is provided which increases with the sale of each ticket in the system. The dispensers (530) have code readers (355, 357) which are used to detect the sale of each ticket (352). The game is won when the code number detected by one of the code readers (355, 357) matches the code for a jackpot winner.

French Abstract

Cette invention concerne un systeme de jeu de loterie, du type a etat unique ou a etats multiples (502, 504, 510). Chaque systeme est compose de multiples jeux differents a tickets gagnants instantanes (32) et de distributeurs de tickets (530). Le systeme est assorti d'un systeme informatique de controle. On trouve une cagnotte qui augmente a proportion des tickets de jeu vendus. Les distributeurs (530) comportent des lecteurs de code (355, 357) servant a detecter la vente de chaque ticket (352). Le jeu est gagne lorsque le numero de code detecte par l'un des lecteurs de code (355, 357) correspond au code gagnant de la cagnotte.

English Abstract

A gaming device (100) wherein a play generates one of multiple possible outcomes (120, 130) having reverse payout information (Figs. 3a-3d). The gaming device (100) includes a memory device (124, 116) containing a first set of data correlating possible outcomes to a first set of payouts (Fig. 2a-2c) and a second set of data correlating possible outcomes to a second set of payouts (Figs. 3a-3d). The second set of data correlates a majority of outcomes to positive payouts and the first set of data correlates a majority of outcomes to other than positive payouts. The gaming device (100) also includes a payout selector (144) indicating a mode of play for which of the first set of data and the second set of data the gaming device (100) is to access. In an alternative embodiment, the gaming device (100) includes a memory having only the second set of data.

French Abstract

La presente invention concerne un dispositif de jeux et paris (100) dans lequel un jeu genere l'un des multiples resultats possibles (120, 130) comportant une information de remboursement inverse (Fig 3a - 3d). Ce dispositif de jeux et paris (100) comporte un dispositif de memoire (124, 116) contenant d'une part un premier fichier de donnees faisant une correlation entre les premiers resultats possibles et un premier jeu de remboursements (Fig. 2a - 2c), et d'autre part un deuxieme fichier de donnees faisant une correlation entre les deuxiemes resultats possibles et un deuxieme jeu de remboursements (Fig. 3a - 3d). Le deuxieme fichier de donnees fait la correlation d'une majorite de resultats avec les remboursements positifs, le premier fichier de donnees faisant la correlation d'une majorite de resultats avec des remboursements autres que positifs. Ce dispositif de jeux et paris (100) comporte egalement un selecteur de remboursements (144) indiquant un mode de jeu designant

lequel du premier fichier de donnees ou du deuxieme fichier de donnees doit etre offert en acces au dispositif de jeux et paris (100). Selon une realisation, le dispositif de jeux et paris (100) comporte une memoire ne comportant que le deuxieme fichier de donnees.

English Abstract

A multi-tiered wagering game and method, including a playing card wagering game, involves placing a first game wager (22a-c) and an optional second wager and entry fee (23a-g) to participate in the game. Cards are dealt by the dealer, two face down to the dealer (21) and three face down to each player (19a-g). Players inspect their cards and the dealer gives each player the opportunity to withdraw one part of their bet. The dealer then turns over one of the cards (21) and again gives each player the opportunity to withdraw a second part of the bet. Then all remaining face down cards are shown, and based on the shown cards the remaining game wagers are resolved. Also based on the shown cards, players that placed an optional second wager and entry fee (23a-g) become eligible for bonus payouts and become eligible to participate in a second game to determine the winner of a super jackpot.

French Abstract

Jeu de carte pour parieurs a plusieurs niveaux et son mode d'emploi consistant a déposer une premiere mise (22a-c) et une seconde mise facultative et un droit d'entree (23a-g) pour y participer. Les cartes sont distribuees face vers le bas par le meneur de jeu a raison de deux pour lui-meme (21) et de trois par joueur (19a-g). Les joueurs regardent leurs cartes et le meneur donne a chacun d'eux la possibilite de retirer une partie de l'enjeu. Chacun des joueurs decide, puis le meneur retourne l'une des cartes (21) et redonne a chacun des joueurs la possibilite de retirer une deuxieme partie de l'enjeu. Les joueurs decident, puis montrent leurs cartes, et en fonction de celles-ci, les mises restantes sont resolues. Egalement en fonction des cartes, les joueurs ayant place une deuxieme mise facultative et un deuxieme droit d'entree (23a-g) deviennent candidats a l'attribution d'un bonus et a la participation a un second tour qui designera le gagnant de la super cagnotte.

TEXT:

... if they cannot get liability insurance (which would transfer the risk to a risk neutral **insurance** company). Most damage **awards** are legally insurable.⁸⁶ Even when they are not, many defendants are publicly held corporations...effect, the introduction of a multiplier turns the liability component of the price into a **lottery ticket**, with a bigger price up front supporting the chance of a bigger payoff at the end.

If customers are risk neutral, they will be indifferent toward this **lottery**; and if they are risk-preferring then they might actually like this sort of a **gamble**. It is more plausible, though, to assume that customers are risk averse, at least with respect to this sort of contingency. Those who would like some additional **gamble** can always go to the race track or play the state **lottery**, and it would be odd to posit a taste for **gambling** that could only be satisfied by wagering on a particular product defect. For most customers, then, the introduction of this extra **lottery** element will make the product less attractive, causing an additional welfare loss.⁹²

Moreover, this...

...to the insurance company his or her right to the punitive portion of any damage **award**. In theory, the up-front payment by the **insurance** company would exactly compensate the consumer for that part of the higher product price that...

TEXT:

... and crisis of the welfare state. It is argued that the development of the National **Lottery** is part of a fundamental recomposition of the state which reflects the decomposition of the...

...the organising principle of the Keynesian Welfare State and its replacement by the 'law of **lottery** ' as the principle regulatory mechanism of the neo-liberal capitalist state.

Recent years have seen...

...state was premised to a recomposition of the state according to an emergent 'law of **lottery** '. These claims require some initial theoretical clarification.

Our argument in this paper is that the 'law of insurance' and the 'law of **lottery** ' represent changing tendencies within the 'general law of capitalist accumulation' through which the capital relation...of global Keynesianism. This needs to be related to our later remarks that the National **Lottery** constitutes an important neoliberal response to the fiscal crisis of the state. What we are suggesting is not that the money raised from the **Lottery** is sufficient to overcome the fiscal crisis of the state; but, rather, that modes of state intervention are becoming increasingly **lottery** -like in their forms.

The 'law of **lottery** ' is connected to the increasing problems of assessing risks through actuarial principles which is itself...

...the planner state. We explore this through an analysis of the workings of the National **Lottery** and the linkages between the crisis of insurance and the crisis of the state. We...

...meant that both levels of social welfare and access to employment has increasingly become a **game of chance** -a **lottery** . In the UK this national **lottery** has recently been accompanied by an official version-the National **Lottery** . Risk and chance are thus basic characteristics of the production and reproduction of neo-liberal...

...is legitimated through a state-sponsored discourse of risk and chance. In other words, the **lottery** has developed into a social form-a form of social being-which we explore in this paper as the 'law of **lottery**'. In order to pursue these themes we will begin by exploring the basic social form of chance and risk through an analysis of the National **Lottery** and insurance.

The National **Lottery**

There is nothing new about national **lotteries**. In Britain the first national **lottery** was sanctioned by Elizabeth I, took place in 1569 and consisted of 400,000 lots at 10 shillings each. In the years that followed the **lottery** became an essential tool of public finance. The profits from **lotteries** were used to repair harbours and ports and provided funds for expensive military campaigns: 10million...

...the Spanish Succession and later over 70million for the war against the American colonies. The **lottery** also provided resources for important infrastructural investment: both Westminster Bridge and the British Museum were established with resources from **lotteries**.

Later **lotteries** also benefited members of the 'propertied class' who bought vast quantities of the tickets which...

...beyond the means of ordinary people, and wealthy agents were able to sell shares in **lottery tickets** at a premium. This practice was formalised in 1788 when the Treasury sold all **tickets** to 'lottery contractors', often stockbrokers, who were responsible for generating the feverish excitement around the drawing of the **lottery**. Alongside this was the underground practice known as 'insurance': with tickets valid for a certain number of draws, individuals could 'hire' a **lottery ticket** for one of the days in which the **lottery** was being drawn and were thereby entitled to any prize drawn for that ticket on that day. There was, therefore, both the **lottery** and a **lottery** within a **lottery**: **gambling** on the outcome of the **lottery**.

The demise of the **lottery** is often attributed to the wave of public opposition generated by the new generation of political economists. In the 17th century William Petty described the **lottery** as a tax on 'unfortunate, self-conceited fools'. Adam Smith, David Ricardo and Henry Thornton all commented on the negative effects of **lotteries** on both the moral and economic health of the nation. According to a Parliamentary Report of 1808 the results of the **lottery** were that: Idleness, dissipation and poverty were increased: the most sacred and confidential trusts were...

...the perpetrators to death were committed.

This was compounded by the declining proportion of the **lottery** which contributed to the Exchequer; by 1819 the **lottery** was contributing less than one per cent to the 'ways and means' account of the Government. Consequently, the **lottery** was abolished in 1823, and apart from Premium Bonds, which were introduced in 1956, and...

...skill rather than chance) it has lain dormant ever since. Indeed, from the Victorian period **gambling** has been presented by both the state and the Church as a crime and a...

...Geoffrey Fisher, Archbishop of Canterbury, who fulminating against the introduction of Premium Bonds argued that **gambling**:

debas(ed) the spiritual coinage of the people (and that) ... the Government knows, as well...

...quoted in Financial Times 9/1/95).

Harold Wilson labelled Premium Bonds a 'squalid little **raffle**'.

However, in 1994 the National **Lottery** was re-introduced following an absence of over 170 years with the support of all...

...political parties and only stifled murmurs of discontent from the established Church. The new National **Lottery** began operating in the UK in November 1994. In its first full year of operation the **Lottery** operated under licence by the Camelot company had achieved sales of 5.2 billion, raised 1...

...good causes' and contributed 677 million to the exchequer (Camelot, 1996; Fitzherbert et al., 1996). The **Lottery** in the UK claims to be the largest and most efficient **lottery** in the world: when assessed in terms of the level of sales and as the the jackpot, the **Lottery** attracts 30 million regular players to both a twice-weekly draw and to a variety...

...order to assess the views of players and to engender a sense of 'ownership' amongst **lottery** players. Camelot itself has become an important corporate actor: in 1995-6 the company achieved...

...at least 265 million in extra sales (Camelot, 1996).

The 'good causes' which benefit from the **Lottery** come under five headings: arts, charities, heritage, millennium and sport. Money is distributed through the Arts Council, the National **Lottery** Charities Board, the National Heritage Memorial Fund, the Millennium Commission and the Sports Council. In deciding on the eligibility of projects for **Lottery** funds these bodies have to take into account the financial viability of projects, particularly as...

...the applicant. Together with the restrictions on local authority capital spending this has resulted in **Lottery** funds being disproportionately aimed at 'flagship' projects in London and the South East of England...

...share of the funds available (see Fitzherbert et al., 1996).

As a social form the **Lottery** clearly articulates the contradictions of the capital relation: mediating real human needs through the perverted

...key historical and logical factors behind its development and increasing importance at the present juncture? **Lotteries** have become popular in all advanced societies: indeed, a key argument in supporting the development of a **lottery** in the UK was that apart from Albania the UK was the only European society not to have some type of **lottery**. The National **Lottery** has played an important role in resolving the fiscal crisis of the state: it represents an ideological form which makes the payment of taxation into a leisure pursuit. The **Lottery** is a clear form of voluntary taxation: taxation that is, moreover, highly regressive with lower...

...Times 28/6/95). In a clear link to the past, the fastest sales of **lottery tickets** have been in poorest and richest parts of the UK: the devastated council estates of...

...London (Financial Times 15/7/95). The state has, in essence, encouraged the expansion of **gambling** from 74% of the population prior to the **Lottery** to 89% following the introduction of the **Lottery** (Financial Times, 5/6/95).

The introduction of the **Lottery** reveals important insights into the way in which the neo-liberal state has been reconstituted in the UK. The **Lottery** is a new form of nationalisation. An intensification of state power which attempts to colonize the worlds of **gambling**, charity and culture and make them increasingly functional for the neo-liberal accumulation of capital. Casualties of this process have been capitals within the UK **gambling** sector. Following the introduction of the **Lottery**

, the football pool industry suffered a loss in turnover of between 10% and 15% and...

...210,000 one-arm bandits is 8 million a week less than before the introduction of the **Lottery**. Related to this has been a 17% increase in calls to 'Gamblers Anonymous'. There is also an important sense in which the **Lottery** amounts to an important step towards the nationalization of culture. While the **Lottery** has been presented as part of a 'new cultural golden age' it also will mean the death of many arts organisations which fail to attract **Lottery** funding because either they are not financially viable or because they fail to generate partnership...

...UK as an example we argue that the regulation of societies through the 'law of **lottery**' has become increasingly important as the crises and contradictions of the Keynesian planner state have...

...a crisis of insurance which has resulted in the development and increasing importance of the **Lottery** as a social form. Insurance was the form of state intervention manifested by the modes...

...liberal state in the Keynesian period. We will now explore the way in which the **Lottery** and **lottery**-like forms of state intervention are increasingly manifested by the modes of integration emerging from... contempt (Smith, 1970: 210-11). This was evident, Smith argued, in the universal success of **lotteries** through which individuals were systematically encouraged to pay over-inflated prices for tickets when the ...

...in which this has resulted in the subordination of the state by the 'law of **lottery**'. We will approach this through an exploration of the origins, development and crisis of state...form, however, allowed the state to cover higher than expected levels of unemployment through general **taxation**. Social **insurance**, therefore, linked aggregate levels of unemployment to the fiscal crisis of the state. In other...the spatial and temporal impact of unemployment has, therefore, become a matter of chance: a **lottery**. The 'law of insurance' has thus been supplanted by the 'law of **lottery**'.

The neo-liberal restructuring has involved the simultaneous restructuring of the economic, political and ideological...

...and economic recomposition of new modes of state intervention premised on these principles. The National **Lottery** is the most developed institutional form of this process. The crisis of state insurance is... society is thus a generalized crisis of capital expressed as uninsurability through the 'law of **lottery**'. The death of the future-how soon is now? Acknowledgment We would like to thank...

BASIC-ABSTRACT:

NOVELTY - The method involves receiving a user identifier and policy requirements at a gaming machines (104,106) for a gambling loss insurance policy. And transmitting the policy requirements to a game server (102). The gaming machine receives a premium amount based on policy requirements from the game server. The policy requirement is an indication of type of or amount of coverage. Premium amount is finally displayed.

USE - Used for providing insurance policies for gambling losses.

ADVANTAGE - The method prevents the player from removing the player- tracking card until the period of coverage has expired. It also provides convenient distribution and administration of policies.

DESCRIPTION OF DRAWING(S) - The drawing shows a block diagram of the gambling method.

INT-CL (IPC): G06F017/60

ABSTRACTED-PUB-NO: KR2003041218A

BASIC-ABSTRACT:

NOVELTY - A method for supplying an advertisement lottery ticket using the Internet is provided to enable a consumer to receive an opportunity for receiving a prize winning money and enable a lottery ticket entrepreneur to pay a prize winning money through a contract with an insurance company by connecting to a web server managed by the lottery ticket entrepreneur and requesting a lottery ticket issue for publicizing a store of an advertiser, thereby enabling the lottery ticket entrepreneur to receive an advertisement lottery ticket adapted to an image of an individual or the store at low cost and to supply the consumer without pay.

DETAILED DESCRIPTION - A general user or an advertiser(20) connects to a web server(50) of a lottery ticket entrepreneur(10) through an Internet. The advertiser(20) orders a lottery ticket to the lottery ticket entrepreneur(10) in accordance with a procedure for purchasing an advertisement lottery ticket and executes an electronic payment of a cost with respect to the ordered advertisement lottery ticket. The advertiser(20) distributes a supplied advertisement lottery ticket to a consumer(30) without pay. Thus, the consumer(30) connects to the web server(50) at a drawing date for checking a drawing of the advertisement lottery ticket through a member joining process. If the advertisement lottery ticket is drawn, the consumer(30) receives prize winning money from an insurance company(40). If the consumer(30) is not a member, the prize winning money is paid from the lottery ticket entrepreneur(10).

(57) ABSTRACT

A method and apparatus of playing a card game such as Blackjack provides a player with at least one additional option for playing the card game. For example, a Blackjack player who has made an initial bet and was dealt an unfavorable starting hand may be provided with at least one additional option, such as making a bust insurance bet or mortgaging a round of play. If the player makes a bust insurance bet, he will receive a payout if he then busts upon drawing an additional card. If the player selects a mortgaging option, he agrees to play the current round of play or at least one future round of play in accordance with a revised rule that is unfavorable for the player in exchange for receiving an advantage during the current round of play.

ABSTRACTED-PUB-NO: US 6540230B

BASIC-ABSTRACT:

NOVELTY - The method involves dealing at least one card to a player to form a starting hand, and dealing cards to the player according to the player's request to form a current hand. The total value of the current hand is calculated. When the total value exceeds a predetermined value, a bust insurance benefit is given to the player.

USE - For playing e.g. blackjack in e.g. physical casino, online casino, gaming operators.

ADVANTAGE - Offers additional option to player dealt with unfavorable starting hand, thus preventing player from getting discouraged in playing further.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart of the card game playing process.

(57) **ABSTRACT**

A system and method for providing a gambling loss insurance policy automatically computes insurance premiums and processes gambling sessions covered by the gambling loss insurance policies. The players may purchase the insurance policies using various means such as coins, earned winnings, or credit cards. The gambling loss insurance system provides a high level of flexibility for the players to define specific parameters of the insurance policy. Additionally, the players may purchase the insurance policies directly from the gaming machine, a custom terminal on casino floor, or cage personnel having access to a centralized network server.

BASIC-ABSTRACT:

NOVELTY - A network server (200), connected to a game terminal e.g. slot machine (500), receives policy requirements from the game terminal. The game server determines a premium cost based on the policy requirements. The network server transmits information, which corresponds to the premium cost, to a user.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) a game server;
- (b) a game machine;
- (c) a computer readable medium;
- (d) a gambling insurance policy providing method;
- (e) a game transaction processing method;
- (f) a gambling insurance policy establishing method.

USE - For providing gambling insurance policy for protection against gambling losses.

ADVANTAGE - Provides protection against unlimited gambling losses with flexible insurance policies. Enables players to move between slot machines while maintaining high level of playing enjoyment.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of gaming system.

Network server 200

Slot machine 500

BASIC-ABSTRACT:

NOVELTY - The user specified policy requirements associated with gambling loss insurance policy and player identifier (ID) are stored in memory (550). The player ID and game result are transmitted to game server which accesses policy requirements corresponding to the player ID and determines corresponding insurance adjustment under the policy.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Game system;
- (b) Game server;
- (c) Recording medium with program for processing game transaction of player

USE - For issuing gambling loss insurance policies to player in casinos which comprise slot machine, table game, video poker machine, standard reel machine, keno machine, etc.

ADVANTAGE - The game server calculates the premium cost based on the game result and player specified policy requirement, thereby provides protection against unpredictable gambling losses.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of slot machine.
